

MGMT 571
PEER EVALUATION
(Confidential)
Due: Oct 3, 2019
Email to sun244@purdue.edu

Team Name Data Dilley Your Name Maharshi Datta

Please evaluate the total contribution of the other members of your team as follows.
Note: You are **not** to evaluate yourself - only your teammates.

In giving them a score, assume that there are 100 points available for each member of the team (other than you). Thus, if the team size is three (including you), there are 200 points available to distribute among your two teammates. Allocate them in a manner which you believe properly reflects each person's relative contribution to the final project. If all are judged equal, then each would receive 100 points. If you judge them to have made different contributions, then some will be over 100 while others will be under 100. In any case, however, the total points allocated should be equal to 100 x number of your teammates.

Since this will be a factor in their evaluation that may affect your own MGMT 571 course grade, please give this careful thought. Your evaluations are *strictly confidential*.

Team Members	Indicate (A-D, see below) the main reason for giving the score	
	Points	
1. <u>Mohinder Pal Goyal</u>	<u>100</u>	<u>A</u>
2. <u>Zaid Ahmed</u>	<u>100</u>	<u>A</u>

- A: Actively participated in the team activities, Including discussions, homework assignments, and/or case discussions.
- B: Participated in most team activities.
- C: Occasionally participated in team activities.
- D: Seldom/never participated.
